

Allied EMS Systems Inc.

Patient refusal information sheet (Please read and keep this form)

This form has been given to you because you have refused treatment and/or transportation by the Emergency Medical Service. Your health and safety are our primary concern, although you have decided not to accept our advice, please remember the following:

1. The evaluation and or treatment provided to you by the EMS crew is not a substitute for medical evaluation and treatment by a physician. We strongly advise you to get medical evaluation and treatment.
2. Your condition may not seem as bad to you as it actually is. Without treatment your condition or problem could become worse. If you are planning to get medical treatment, a decision to refuse treatment or transport by EMS may result in a delay which could make your condition or problem worse.
3. Medical evaluation and/or treatment may be obtained by calling your doctor, if you have one, or by going the nearest hospital Emergency Department in the area, all of which are staffed 24 hours a day by Emergency Certified Physicians. You may be seen the Emergency Department without an appointment.
4. If you change your mind or your condition becomes worse and you decide to accept treatment and transport by the Emergency Medical Service, please do not hesitate to call us back, by dialing 911. We will do our best to help you.
5. **Don't wait! When medical treatment is needed, it's usually better to get it right away.**
